[Portfolio](#) • [LinkedIn](#) • [Github](#)

Frontend developer with 4+ years of experience building maintainable websites, scalable CMS architectures, and operational systems. Experienced in Webflow development, content systems, workflow improvement, and documentation. Known for translating complex requirements into clear, practical solutions.

EXPERIENCE

NEP Services

Web Team Lead | Senior Webflow Developer (2025–Present)

Web Developer (2021–2025)

Build and maintain Webflow websites for union-focused and mission-driven organizations.

Design scalable CMS architectures and structured content systems.

Develop responsive, accessibility-conscious frontend experiences focused on usability and maintainability.

Contribute to implementation standards, reusable components, and team onboarding resources.

Improve QA, documentation, and review processes through structured workflows, automation, and SOPs.

Collaborate across design, development, and project teams throughout the project lifecycle.
